

Eliztap NFC Hardware Hub – Product Requirements Document (PRD)

1. Introduction

This document explains in simple English how the Eliztap NFC Hardware Hub should work. It is written for developers, designers, and project managers.

The goal is to build a system where businesses can: - See NFC devices - Understand how they work - Book devices - Customize branding - Receive devices - Manage and reuse devices - Track performance

This system will run on:

hardware.eliztap.com

2. Purpose of the System

The Hardware Hub will:

- Show available NFC products
 - Allow businesses to request and book devices
 - Automatically create user accounts
 - Connect orders to suppliers
 - Manage branding
 - Track devices
 - Allow links to be changed anytime
 - Support reuse of devices
-

3. Target Users

3.1 Business Owners

- Shop owners
- Restaurants
- Event organizers
- Service providers
- SMEs

They want easy tools to get reviews, menus, profiles, and digital links.

3.2 Eliztap Admin Team

- Sales staff
- Operations staff
- Support staff
- Management

They manage orders, suppliers, devices, and customers.

3.3 Suppliers

- NFC manufacturers
- Printing companies
- Packaging companies

They produce and ship devices.

4. System Overview

The system has three main parts:

1. Public Website (No Login)
 2. Business Portal (Login Required)
 3. Admin Dashboard (Staff Only)
-

5. Public Website Features (hardware.eliztap.com)

5.1 Homepage

Purpose: Welcome visitors and explain the service.

Must show: - Main message - Benefits - How it works - Buttons to view devices - Trust messages

5.2 Device Catalog Page

Purpose: Show all available NFC devices.

Features: - Device pictures - Name - Use case - Price range - Delivery time - "View Details" button

Filters: - By industry - By price - By size - By usage

5.3 Device Details Page

Each device must have: - Multiple photos - Description - What it is used for - Supported phones - Branding options - Delivery time - Warranty info - FAQ - "Book Order" button

5.4 Branding Gallery Page

Shows: - Sample branded devices - Different colors - Logo placements - Past client examples

5.5 How It Works Page

Shows simple steps:

1. Choose device
2. Book order
3. Customize branding
4. Production
5. Delivery
6. Activation

5.6 FAQ Page

Answers common questions: - Phone compatibility - Setup - Replacement - Editing links - Returns - Support

6. Booking System

6.1 Cart Page

Users can select: - Device type - Quantity - Branding option - Country

Shows: - Estimated price - Production time - Shipping time

6.2 Business Information Form

Required fields: - Business name - Owner name - Phone number - Email - Address - Industry

Optional: - Website - Number of branches

6.3 Confirmation Page

After booking:

Shows message: "Thank you. Our team will contact you shortly."

System must: - Save order - Send email - Send SMS - Alert admin

7. Account Creation System

7.1 Automatic Account Setup

When booking is completed:

If email is new: - Create account - Generate password - Send login link

If email exists: - Link order to account

7.2 User Login System

Users can: - Login - Reset password - Change password - Enable security options

8. Business Dashboard (portal.eliztap.com)

8.1 Dashboard Home

Shows: - Active devices - Orders - Notifications - Tips

8.2 My Devices Section

For each device: - Device ID - Status - Current link - Edit link button - Usage count

8.3 Orders Section

Shows: - Order history - Payment status - Tracking - Invoices

8.4 Branding Section

Allows users to: - Upload logo - Choose colors - Preview design - Approve design

8.5 Analytics Section

Shows: - Number of taps - Daily usage - Review clicks - Conversion rate

8.6 Support Section

Users can: - Open tickets - Chat with support - Request replacement - Report damage

9. Dynamic NFC Link System

9.1 Redirect System

Every NFC must point to:

go.eliztap.com/deviceID

This page redirects to: - Review page - Menu - Website - Profile

9.2 Link Management

Business owners can: - Change links anytime - Schedule changes - Add multiple links - Set fallback links

9.3 Reuse System

When device is returned or inactive: - Admin can reset - Clear old data - Assign to new user

10. Admin Dashboard (admin.eliztap.com)

10.1 User Management

Admins can: - View users - Suspend accounts - Reset passwords - Assign managers

10.2 Order Management

Shows: - Order list - Status - Payments - Supplier info

Status flow: Pending → Approved → Paid → Production → Shipped → Delivered → Active

10.3 Device Registry

Stores: - Device UID - Batch number - Client - Status - Activation date

10.4 Supplier Management

Admins manage: - Supplier list - Prices - MOQ - Lead time - Quality ratings

10.5 Pricing Control

Admins can: - Set base price - Add margin - Create discounts - Adjust per country

10.6 Support Management

Admins handle: - Tickets - Escalations - Refunds - Replacements

11. Supplier Integration System

11.1 Purchase Orders

System generates: - Order document - Branding files - Device specs

11.2 Production Tracking

Suppliers upload: - Photos - Videos - Progress reports

11.3 Shipping Tracking

Stores: - Courier name - Tracking number - Delivery status

12. Device Provisioning System

12.1 Batch Registration

When devices arrive: - Scan UID - Register batch - Assign owner

12.2 Activation Process

Admin clicks: "Activate"

System: - Enables redirect - Links account - Starts analytics

13. Notifications System

System sends: - Email - SMS - In-app alerts

For: - Orders - Payments - Shipping - Activation - Support

14. Security & Data Protection

Must include: - Encrypted passwords - Secure payments - Access control - Activity logs - Daily backups

15. Reporting System

Admins can see: - Sales reports - Revenue - Device usage - Supplier performance - Customer growth

Exports: - PDF - Excel

16. Integration With Main Eliztap Platform

Hardware Hub must connect with: - Review system - Business profiles - CRM - Finance system - Inventory system

17. Performance Requirements

System must: - Load in under 3 seconds - Support 100,000+ users - Handle 10,000+ devices - Work on mobile

18. Scalability Plan

Future support: - Multiple countries - Multiple currencies - Multiple suppliers - Reseller accounts - White-label partners

19. Phase Development Plan

Phase 1 (MVP)

- Public catalog
- Booking system
- Basic admin
- Manual supplier flow

Phase 2 (Growth)

- Payment gateway
- Auto provisioning
- Supplier APIs
- Advanced analytics

Phase 3 (Platform)

- Global logistics
 - AI forecasting
 - Smart pricing
 - Reseller portal
-

20. Success Metrics

Measure: - Visitors to bookings - Orders to delivery - Activation rate - Repeat orders - Customer retention

21. Future Enhancements

Planned features: - Mobile app - Device insurance - Subscription hardware - Leasing options - Smart campaigns - Offline sync

22. Approval

This document must be approved by: - Product Owner - Technical Lead - Operations Lead - Management

Before development starts.
